

: STEP № 1 : Capital // Financial procurement : % + ‰ !!!

Good to know. 98% OpenSource. 100% is your Benefit. 2 % are our Profit ...

It pays off ! What is it about ? ! Sustainability ! No life is possible without it . . .

Patentmarketing + Finance [<http://www.humanearthling.org/patent>]

Such a "handgrip for ingredience and material release" is really a fine thing !

It is about mass articles such as a stirring - or even an active ingredient stick. And

Reusable Storage Packages. The packaging market for containers of ingredients

and materials (*for gripping by hand*). It is about shampoo bottles, disposable

lighters and also toothpaste tubes. What else is there ? Present state of affairs !

The protection claims are comprehensively formulated. Together with a competent

patent attorney and procedural cost support, a successful application [with priority

of the application dated 18.12.2012] and realistic prospect of a binding legal claim !

Now it is about a near-term and also goal-oriented implementation ! International . . .

: STEP № 2 : Introduction :

Encounter. Planning and talking !

BRAINSTORMING : Meeting of activists and supporters 2024 / 2025 / 2026 ...

: STEP № 3 : Implementation and Action :

ECO - ISLAS [Permaculture & AGROECOLÓGICA : **Una realidad que apoyamos !**]

INTERNET + MEDIA [Information + Public Relations ~ **RegioWIR - GlobalWE**]

Projects + CONCEPTS [THE T E A M = ABCDEFGHIJKLMNOPQRSTUVWXYZ]

MEAT – FOOD – SEED [Acción (V) Tierunrecht ; ! Cooperation vs. Corporation ¿ ?]

: STEP № 4 : Talking about a Revolution :

Hashtag **#vote2024** + This is about the election of a world spokesman in

2024. One Planet. One Voice. And because it is a profoundly grassroots

handling in our co - concerns and opposite with each other, it also

appears completely unrealistic and downright illusory, so we should be

able to realize it together. From a purely practical considered the date

2024 is truly the purest fudge. The construction of this infrastructure

alone needed for a proper election procedure is [Today until 01 / 01 /

2024] simply not to provide, within that period. However, if Microsoft and

Apple, the Linux - community and of course Android, and also the people

of Google, are going together with it the 31/12/2027 as the election date

then a feasible vision. Granted. That is only for these logistical challenges

in the next months and years just completely unrealistic and downright

illusory. And precisely for this reason, we should make it in reality. If we

don't live this reality and our dreams. Then we do not live. We are dead !.
